Inhalt

Step 1 - Open the Control Panel

Open the Run dialog with the keyboard shortcut "Windows (⊞) + R" and enter the command "control".

Step 2 - Open "Programs and Features"

Now click on "Programs" and then on "Programs and Features".

Step 3 – Uninstallation of Network Identity Manager, Heimdal and OpenAFS (reboot is required!)

1. Right-click the „Network Identity Manager" program and select „Uninstall". Confirm any messages that may appear and follow the uninstallation routine.
Network Identity Manager	Secure Endpoints Inc.

2. Right-click on the program "Heimdal" and select "Uninstall". Confirm any messages that may appear and follow the uninstallation routine.

| Heimdal 1.6.2.0	Heimdal Developers

3. Right-click on the "OpenAFS (64-bit)" program and select "Uninstall". Follow the uninstallation routine.

OpenAFS (64-bit)	Your File System Inc.

If the following message appears, please confirm it with „OK".

OpenAFS (64-bit)

The setup must update files or services that cannot be updated while the system is running. If you choose to continue, a reboot will be required to complete the setup.

OK   Cancel

Now select "Yes" to finish the process. Your computer will reboot now.

OpenAFS (64-bit)

You must restart your system for the configuration changes made to OpenAFS (64-bit) to take effect. Click Yes to restart now or No if you plan to manually restart later.

Yes   No
